

What's new in 3Dsurvey v2.5.2

What's new:

- improved camera pan in ortho and perspective mode;
- added progress bar when exporting orthophotos.

What's fixed:

- fixed duplicated entries in the list of latest used coordinate systems,
- better handling of unknown license type,
- fixed crashing of 3Dsurvey when performing measurements using imported ground control points,
- fixed freezing of 3Dsurvey when pausing progress bar,
- displaying of the wireframe is now possible when draping orthophoto,
- fixed translation errors associated with some languages,
- fixed units of measurement associated with contour lines exports,
- validation points got reset when importing ground control point coordinate system – now fixed.
