

What's new in 3Dsurvey v2.6.1

What's new:

- consistent mouse cursor across all functionalities of application,
- line vertices are movable with single click,
- line drawing can now be confirmed with enter/return,
- last vertex when drawing line can now be removed with backspace.

What's fixed:

- fixed compatibility with DXF2000 format,
- fixed volume calculation size limitations that crashed an application,
- fixed rendering issues with imported DXF data,
- fixed closed polyline length calculation,
- fixed contours text height when exporting to DXF,
- profile segment length is now properly used when calculating profile,
- fixed missing untranslated strings,
- fixed Hungarian and Portuguese translations encoding issues,
- fixed point snapping on DSM that crashed an application,
- fixed point cloud snapping accuracy issues,
- fixed CAD item properties updates.

Known issues:

- importing DXF might cause an application to crash.
