

What's new and fixed in 3Dsurvey v2.9.4

What's new:

- **3Dsurvey software is now available in three more languages.**
New available languages are: Turkish, Polish and Russian
- Updated EPSG database, a lot of new coordinate reference systems and transformations now available in software
- Added ability to load orthophotos in our JavaScript engine

What's fixed:

- Fixed crash problem when loading EXIF data with empty strings
- Fixed altitude calculation when transforming coordinates from one geodetic datum to another
- Improved Turkish translations
- Fixed camera initialization for some images with missing EXIF image width/height
- Fixed unit handing when displaying height data for CAD points
